

# baramind

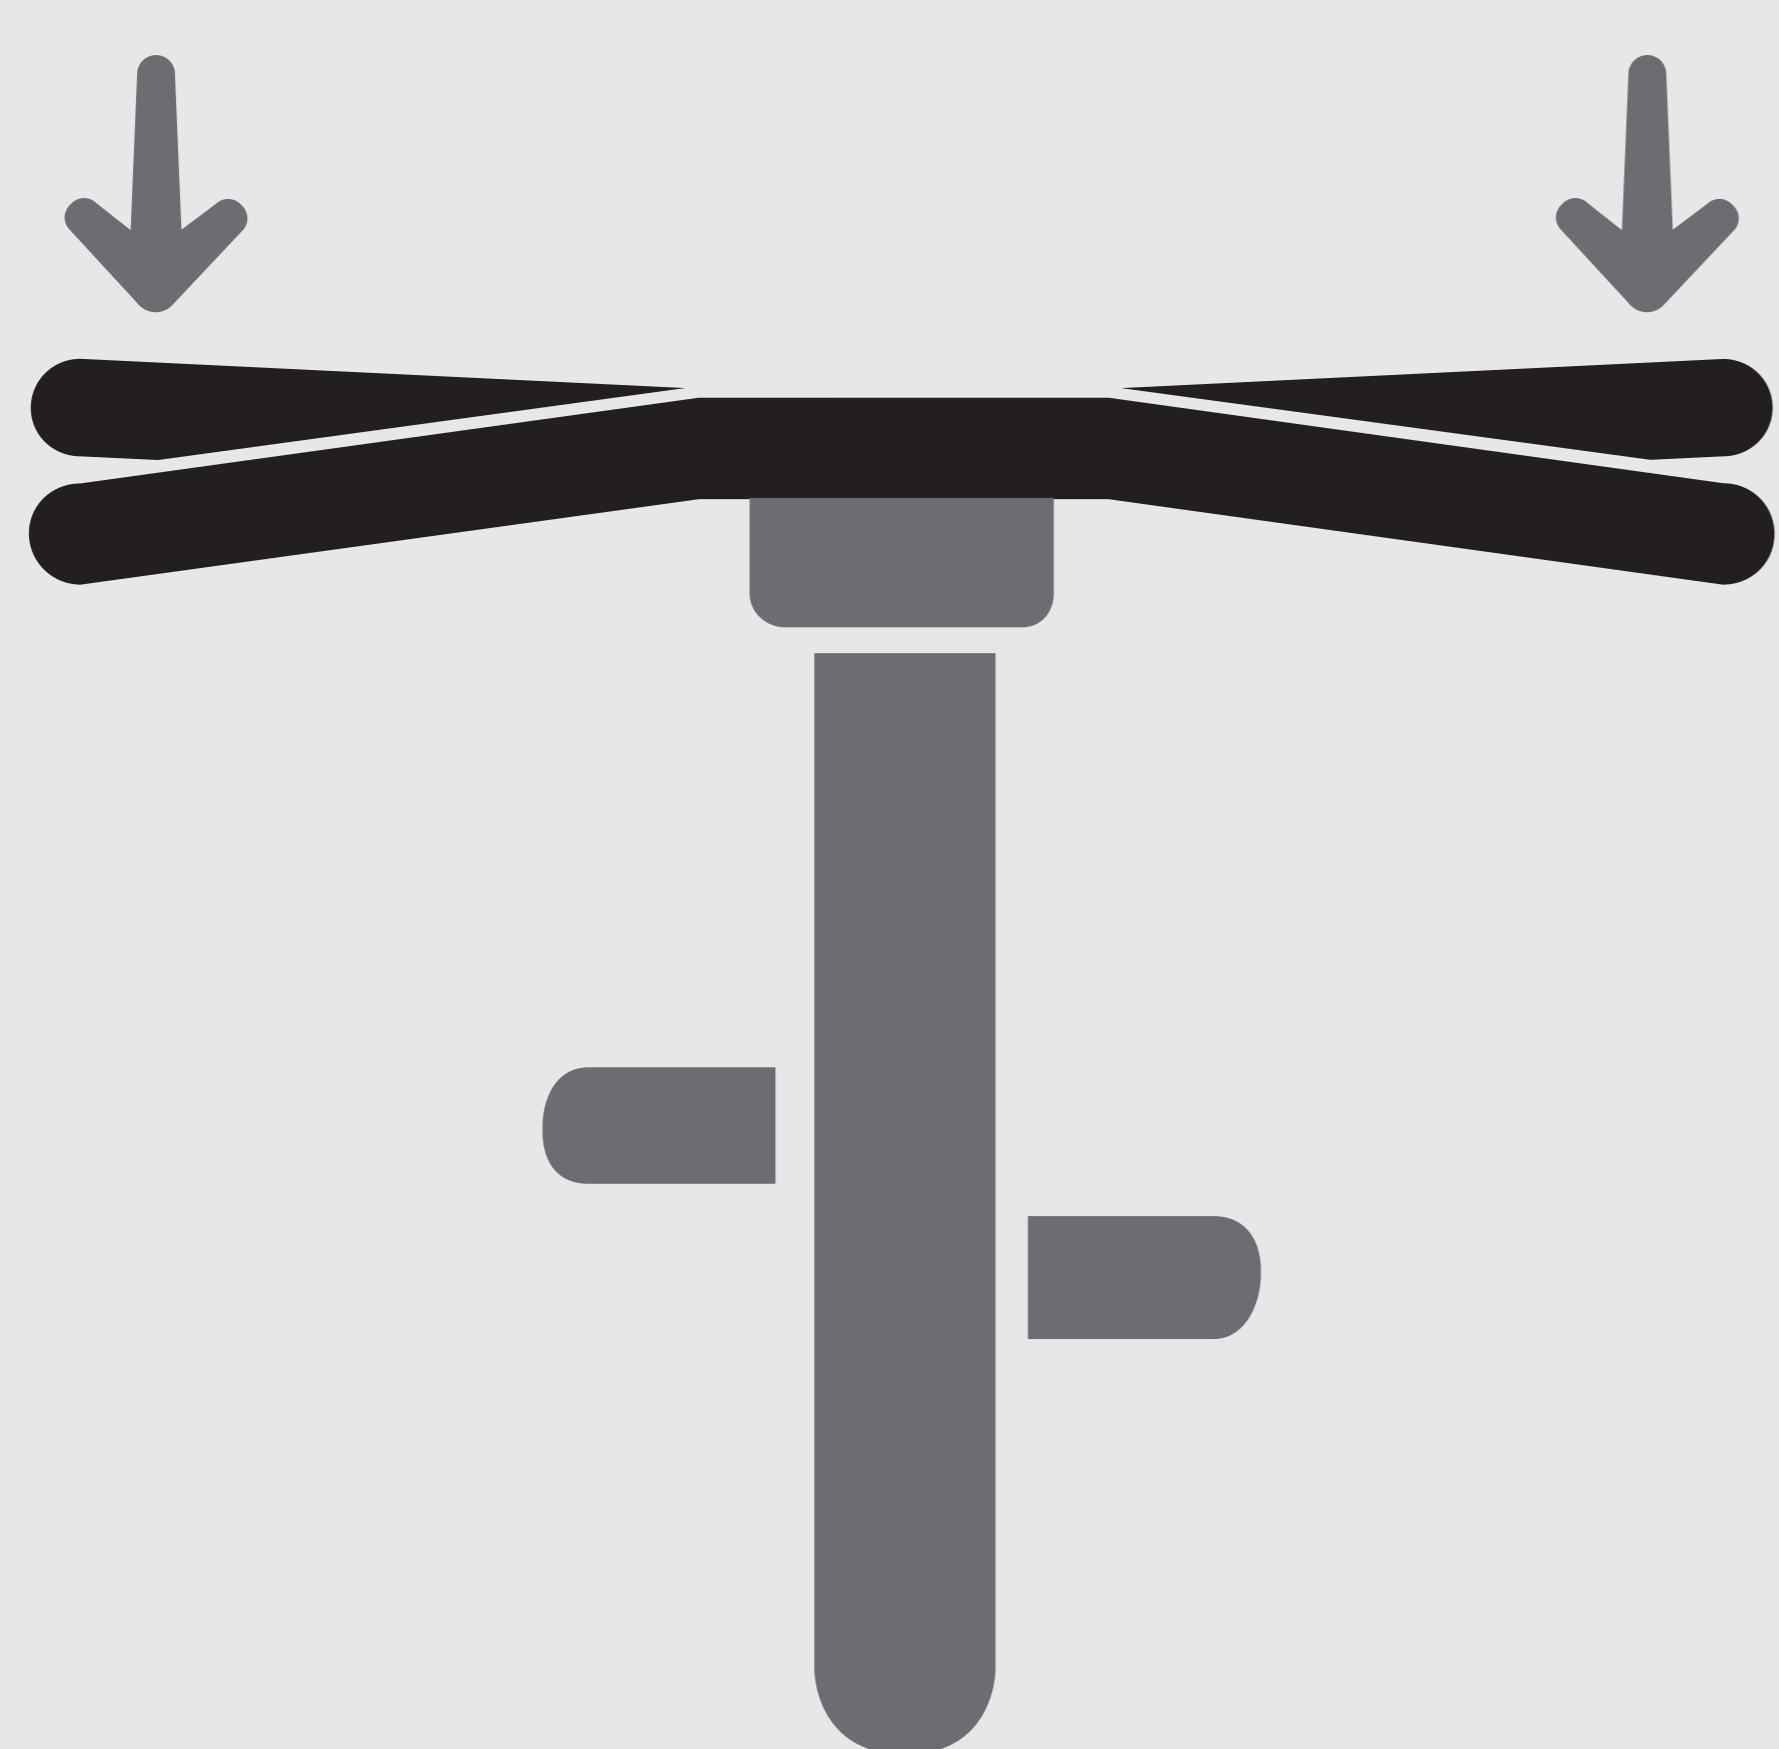

HANDLEBAR TECHNOLOGIES

PATENTED

## FLEXBAR TECH

### MORE COMFORT

BARAMIND handlebars are specially engineered **to absorb shocks and smooth out vibrations**. Their efficiency is optimal on potholes, **cobblestones** or bumpy roads.

### FLEX CONTROL SYSTEM

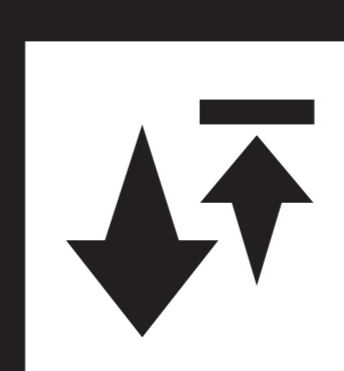

BARAMIND handlebars are built using **composite materials** coupled with an exclusive **insert system**. Thereby, BARAMIND is flexible downwards and remains **rigid upwards**.

### IT WORKS!

**Lab and field tests** were made using accelerometers. Results show that BARAMIND **reduces vibrations transmissibility** from handlebar to rider's wrists. It also improves **muscle recovery**.
